

Solving the Climate Crisis: The Economic Journey from *Greed to Green*

Come hear Boston College's Prof. Charles Derber speak on his hopeful book, *From Greed to Green: Solving Climate Change and Remaking the Economy*.

Additional climate, peace, and economic justice speakers will join this conversation.

The time bomb of Global-Warming / capitalist consumerism can and must be solved through both individual and institutional change. People have more power than we think. We need to release ourselves from the bonds of hopelessness and denial, so we can transform both ourselves and our institutions.

Ralph Nader notes: “*Charles Derber’s urgent call to action on climate change connects to realistically upbeat ways to help resolve our energy, peace, and*

employment challenges.”
